Dark Indulgence: 18 Black Bathtubs for a Stylish, Dashing Bathroom!

by Sherry Nothingam

The idea of a relaxing bathroom at home often evokes images of a **spa-inspired setting** where it is white and light blues that hold sway. Darker tones are often shunned in favor of pastel hues, and the modern trend has been to add a few warm, wooden accents to complete the appeal of curated opulence. But have you ever thought about black in the bathroom? Even if you are not willing to commit to dark gray and black walls, tiles or accessories, maybe a stunning black bathtub in that sea of white would be more to your taste! Underrated and often underused, the **black bathtub** is a showstopper that never fails.

With **freestanding tubs** becoming the norm once again in contemporary bathrooms, it is time to think about giving your bathroom that much needed makeover with a hint of dramatic flair. The bathtub in black is unique, elegant, and fits in surprisingly well with a wide array of styles and decorating themes. Whether you have a luxurious master suite or a small bathroom with limited space, the dark and bold bathtub never leaves you disappointed.

Unleash the Black Magic!

The 90s were a time when the bathtub was firmly anchored to the wall, and it took innovative designers, a fall in prices and a wide range of design options to turn homeowners toward more exuberant freestanding options. Today, the standalone tub comes in a wide range of styles, colors and finishes, and yet few captivate and enthrall as those clad in black. The black bathtub has an air of mysticism that its more modest white cousins seem to lack, and it sure stands out visually when placed in a contemporary bathroom draped in a muted color palette.
