Aquatica has launched the True Ofuro Japanese seated soaking tub.

Handcrafted of American Walnut, True Ofuro has an integrated seat that creates an ergonomic position for bathers, while allowing the entire body to be immersed. True Ofuro also has a built-in ergonomic head rest.

Different woods are available, too. In addition to walnut, bathers may choose from maple, ash, padouk, oak or sapele.

Aquatica also offers versions in the company's patented AquateX material. Colors available in AquateX include multiple varieties of black, grey, brown, blue, green, red and yellow.
