

AQUATICA WINS GOLD AT THE DESIGNER KB AWARDS IN THE UK

02/03/2017

Aquatica is super proud to announce that they have been awarded the Golden Award for Innovation in Materials for their versatile and unique AquateX™ material

Online PR News – 03-February-2017 – Bellevue, Washington – Aquatica is super proud to announce that they have been awarded the Golden Award for Innovation in Materials for their versatile and unique AquateX™ material, which was used in the Tulip AquateX™ Bathtub that was nominated for the award. This inventive and contemporary solid surface material was strategically designed by the company with many different factors in mind.

Aquatica Plumbing Group is a top online distributor and provider of stunning acrylic and stone bathtubs. The company was founded in 2008 in Canada and has grown into a powerful corporation since that time. Nowadays, it has its offices in the USA, the UK, Latvia and Russia. Aquatica is known for its best-in-class bathtubs, which are meticulously designed to cater to the needs of clients.

Aquatica keeps investing into engineering, design and innovation to manufacture premium bathroom pieces produced of the best materials only. One of such innovative materials that has won the award is AquateX. This is a non-toxic, hypoallergenic, inert, fire-resistant and 100% recyclable material, which is combined of two complete opposites – a tough, durable interior and warm, silky soft exterior.

The solid, dense and non-porous surface material is also UV-resistant, durable and hygienic. Its velvet-like structure makes it comfortable to touch and feel it. These are the features, which make it the 21st century composite

material the company utilizes when working on the production of their functional, graceful and eco-friendly bathroom products. This is what the representatives of the company tell about this cutting-edge material: "Aquatica's team conducted extensive research and through much development, we challenged ourselves to create material of only the best and highest of qualities to use for our bathroom ware range. Our formulated composite resulted in a remarkable and first-rate quality allowing us to produce designer bathroom pieces, which can practically be crafted into any shape and geometrical form."

One of the bathroom products, which was manufactured out of the innovative AquateX™ material is Aquatica's True Ofuro Japanese Soaking Bathtub . The product has been nominated for the renowned RedDot Awards that takes place in Germany from January, 21 till February, 10, 2017! "We feel very honored and excited to be a part of this amazing award event for the very first time and we look forward to the results! If you're in Germany on those dates and plan on attending the displays, be sure to give our True Ofuro a try, we promise you will be blown away!", say the representatives of the company.

About the Company:

Aquatica Plumbing Group is a leading manufacturer and retailer of luxurious stone and acrylic bathtubs, which feature outstanding design and excellent quality. The foundation of the company dates back to 2008. Since that time, the company has become popular with the customers, who value comfort and style. They have representative offices in the UK, the USA, Russia and Latvia. Aquatica pays special attention to the quality of products they offer for sale and keeps investing into the design and innovation.
